

# *Sewer and Water Minutes*

*March 11, 2024*

Present: Don Schneyer, Peter Socha, John Loiodice, Mike Buffoni and Jennifer Carmichael,  
Absent: Tony Campetti

Don asked for a motion to accept the February 6th minutes, John moved to approve them  
Peter seconded and all were in favor.

Park Street Pump Station: Expected to be up and running by early April.

Sewer needs analysis: Dave Prickett, the engineer, will probably join us at our April meeting and  
have his recommendations for us.

I & I study: Phase IV was not updated and will be on the agenda for next month.

Ground Water recharge: Mike has called and left messages but not heard back from Mass  
Geological Survey. \$50,000 has already been set aside over a year ago for this project.

Lead services update: Mike has 712 services and only 22 show up as galvanized and will need to  
be replaced. He is waiting on 6 properties to send in pictures to show what they have and only  
10 properties he still needs to get in touch with.

Master Plan update: Mike has emailed Dave Prickett and reminded him there is a sanitary  
survey due this month and is a requirement from DEP. Dave has it just about done but Mike is  
looking for a draft copy before March 27<sup>th</sup>.

Stockbridge Bowl Stewardship Committee: Mike and Mark will continue to do the monthly  
testing at the Bowl but will not be on the committee. John is on the committee through the  
Board of Health and he will update us on the progress.

Mike Concerns: Christine got all the meter readings and Mike got all the water categories done  
and submitted. He is working on the consumer confidence report it will be posted on the Town  
website. URLs will be made up on postcards and mailed to water customers. 12 to 14 Beavers  
have been taken out of the reservoir.

There was an interruption in the meeting as we lost power and rejoined the meeting to adjourn

John made a motion to adjourn and Peter seconded all in favor.

Respectfully submitted,

Jennifer Carmichael
