Dear Katherine,

I can prepare foundation drawings for the "cat and dog" sculpture for \$4,176. We can do this work by mid-March. This will be based on the field measurements we took, which I am attaching here.

We will provide drawings and concrete specs for the town to do the removal of the existing foundation and basin and installation of new concrete foundation and concrete basin. The construction work will not be bid.

We will need to inspect the actual sculpture to verify attachment details. We will assume removal and replacement of coping.

The basin will operate as it does now with town water being supplied, and with water draining out into the ground. There will be no re-circulation pump as some interim sketches had considered.

We will include one site visit.

Additional work, if required would be at hourly rates of \$150/hr, principal and \$90/hr, architect assistant.

If you wish to proceed I would need an initial deposit of \$1,000. The balance would be due on completion of the drawings.

If this is to be done through the town and they need a letter of agreement I can prepare that. Otherwise I can work with your ok of this email via return email as our agreement and payment of the initial deposit.

Please let me know if you have any questions
